

Modernization means different things to different people

BCD's  **ClearPATH** Modernization Suite finally solves that issue by letting you build a customized integrated solution !

What does Modernization mean to you?

- Creating System i or multi-platform web apps & web services with PHP or RPG CGI?
- Instantly web enabling existing 5250 apps with NO coding, or re-purposing legacy apps by adding new functionality?
- Building secure web portals for clients, employees and trading partners?
- Offering single point access to enterprise information with application frameworks, dashboards and content management?
- Automating report / document distribution, PDF's, web archiving and indexing?
- Creating real-time web reports, queries, graphical drill-downs & Excel extraction?
- Getting more out of existing applications or third party packaged software?

Build your own integrated System i Modernization Suite - Select one or more components

If you said yes to any of the above, then BCD & ClearPath need to be on your radar

What's clear is that only BCD lets you choose from a family of award-winning integrated modernization components so you may build your own customized solution. Start with one, a couple of components or BCD's complete ClearPath modernization suite to meet your needs. And, you'll be able to prove each solution in advance on a free trial basis to confirm you're on the right path.

Modernizing with solutions that communicate with each other and dealing with one single vendor who assures seamless support for your customized suite makes this a smart choice. A choice that will save your organization a lot of time and money because BCD's ClearPath components are engineered to work together and are affordably priced.

Thousands of System i clients have already modernized with BCD

BCD has the experience, solutions, support, training and services to assist all size organizations and we have the references to prove it. We're committed to helping you successfully modernize too. See why 1,000's prefer BCD and our modernization tools.

Complete your BCD modernization profile. You'll get a Free Report and a \$1,000 BCD software certificate. Visit www.bcdsoftware.com/profile

Your detailed modernization report will include which ClearPath components you'll need to successfully meet your goals, including cost, possible services & promotional incentives.
