

Extract and analyze report data from IBM i and other reports

Monarch for EZ-Pickin's Professional is a Windows-based report mining and analytics tool that enables business users to efficiently get the information they need. They can easily extract, analyze, graph and summarize data contained in existing IBM i and virtually any other computer-generated reports.

Users can export and distribute the resulting interactive reports as Excel, PDF or other formats. This is all accomplished with minimal help from the IT department and no re-keying or programming.

In one click, work with customized data automatically mined from virtually any report and export it to PDF, Excel and more.

“EZ-Pickin's saves me countless hours. The summary feature saves me from rewriting reports just so I can print summary information.”
— *Patty Schatz, Charles Industries*

Why EZ-Pickin's?

Enhance Decision Making

Get timely and accurate information with powerful self-service data extraction from virtually any report. With analytics at their fingertips, users can create customized views and summaries to better visualize data, spot trends, predict results, and make better decisions.

IBM i Reports to XLS

EZ-Pickin's integrates with BCD's Catapult and Spool-Explorer to transform spool files into spreadsheets and distribute them via email, to network drives or to a web portal. Use Catapult to automate this process and use Spool-Explorer to give end users point and click access.

Easy Access to Data

Quickly find, analyze and extract critical information from reports and transform it into the format you want. With reusable models, users have single-click access to custom views of their reports without re-keying data or help from IT.

Reduce IT Reporting Burden

Reduce the backlog of requests for ad-hoc and new views of reports. Users can now create live interactive views of existing reports and export data into Excel without any help. This will save your IT staff a lot of time.

Simplify Compliance & Auditing

Marry the source reports with newly created reports to easily compare and reconcile financial statements and other reports for auditing, accounting, financial analysis and more. Users can also embed digital signatures for confirmed data lineage and authenticity.

Leverage Existing Reports

Access your “hidden” corporate data from virtually any report, database and spreadsheet. Users can also easily combine existing reports and data from multiple sources and integrate them with applications such as Excel.

Input Sources

Use virtually any computer-generated report including spool files, PDF, text and database files (DB2, SQL Server, etc.).

Custom Views

Create custom views and summaries of reports with totals, calculated fields, drill up and down and more.

Export Data

Eliminate re-keying of data by exporting to Excel, PDF, XML, Access, MS-Word and more.

The screenshot displays the EZ-Pickin's software interface with several panes:

- Report Pane:** Shows customer details for 'The Welsh Connection' (Account Number: 14, State: IL, Order Number: 100072, Date: 2013/01/15, Total: \$2,941.21).
- Table Pane:** A data table with columns: Customer_Name, State, Year, Prod_Code, Description. It lists various products from 'The Rock Studio' and 'The Welsh Connection'.
- Summary Pane:** A table showing order totals by product category and year.

Category	Year	Amount	
3	AMPS	2011	60496.98
4	BANJO	2012	5139.80
5	BANJO	2013	9922.46
6	BASS	2011	12901.25
7	BASS	2011	3735.70
8	GUITAR	2010	102724.01
9	GUITAR	2012	
10	GUITAR	2012	
- Chart Pane:** A 3D bar chart titled 'Order Totals by Product Category and Year' showing amounts for categories like AMPS, BANJO, BASS, and GUITAR across different years.
- Export Dialog:** A '1 Second remaining' dialog box for exporting to Excel. It shows 'Output file: orders.xls', 'Output record count: 126', and a progress bar for 'Excel formatting...'.

Extract Data

Extract report data with reusable templates and transform it into live interactive views.

Analyze Data

Sort and filter data and perform your own custom trend, crosstab and top x analysis.

Chart Data

See the big picture by visualizing data with colorful charts (pie, bar, etc.) and by viewing multiple charts in a grid.

Key New Features

- Export data to Excel Pivot Tables and XLSM files.
- Support for Digital Signatures in XLSX/XLSM.
- Improved compliance with export of full-fidelity XML representation of the source report.
- Export to XML.
- Revamped UI and charting.

Need the latest features?

If you're using an older version of EZ-Pickin's (v4-9) you're missing out on many great new features. Contact us about our affordable upgrade rates.

Visit www.bcdsoftware.com/ezpcompare to see the key new features in each version.

One Click to Excel

In a single click, users run models over their reports to automatically extract and export data. The models require no programming and can include summaries, filters, charts and more.

Models can be reused and shared with other users. They also integrate with Catapult and Spool-Explorer for fast spool file-to-XLS conversion.

EZ-Pickin's is a very efficient tool to take advantage of existing logic built into reports. Its sorting functionality adds value when opening data in Excel. It's a great tool for picking data from reports and then using remote access with ODBC to get any extra data needed.

— Mike Bennett, Kim Ray Incorporated

Transform and Distribute IBM i Reports

Monarch for EZ-Pickin's integrates with BCD's report distribution tools, Catapult and Spool-Explorer, to convert and distribute IBM i spool files as Excel spreadsheets. EZ-Pickin's reusable models can be specified in both tools to extract, mine, and summarize data from spool files.

Catapult and **Spool-Explorer** are also available as standalone solutions. They both convert spool files to PDF, RTF, HTML or TXT and distribute them via email, network drive or local PC.

Catapult

Catapult automates the conversion and distribution process so users receive spool files as Excel files without having to do anything. Catapult can also split reports, apply overlays, route documents using distribution groups, and archive reports to the web in the secure Nexus Portal.

Spool-Explorer

Spool-Explorer is a Windows-based tool that provides end-users point-and-click access to view, email, transform and print spool files, or to open them in EZ-Pickin's.

Why BCD is the best choice for modernization

Industry Leader: BCD has over 35 years of experience in the IBM i and midrange marketplace and is a member of the IBM i ISV Advisory Board. We understand how IBM i developers and IT shops think and work.

Proven Solutions: BCD has won 40 industry awards and has successfully helped thousands of organizations across many industries modernize (*government, education, finance, healthcare, retail, manufacturing, transportation, etc.*) including:

- Starbucks • Universal Music • Formica • Nippon Express
- Toyo Tires • Honeywell • GlaxoSmithKline • Abbott Labs
- Kawasaki • Veolia • Konica Minolta • Mitsubishi Fuso

World Class Technical Support: Our tech support team is consistently rated one of the very best. You will receive unlimited support during your evaluation and for the life of your support agreement.

“ I use EZ-Pickin's with Catapult to automatically send a spreadsheet created from a spool file and the user can manipulate the data from there. Using overlays within Catapult has enabled us to email our invoices and purchase orders. This has saved us printing time, material and labor costs.

— **Patty Schatz,**
Charles Industries

Just giving users the ability to easily select and preview their spool files, and get them into EZ-Pickin's – all without any attention from the IT staff – now that's a productivity aid. ”

— **Mitch Davidson,**
