

# Control access to PHP Web Applications with BCD's Free\* Nexus Portal

Application Frameworks • Web Menuing • Secure Login • Dashboards • User Admin

Award winning Nexus Portal provides a simple way to secure and access PHP and other web applications. It offers single point Web access with a pre-built portal website that includes a secure login page and user management for implementing site wide security. Users only see what they are authorized to see with no programming required. Easily create menu trees or drop down menus to your applications (PHP & others), documents & dashboards, without HTML knowledge. Create specific portals for Employees, Partners and Clients. \*Only annual maintenance is billed for Nexus. **Try Nexus Portal for free.**

**Tight Security**  
System i-based security for total protection. Users will only see their authorized objects including **dynamic web menus**.

**Enterprise Content Management (ECM)**  
Manage, store & publish documents with Nexus ECM. Auto-distribute spool files to the ECM as PDFs with Catapult.

**Executive Dashboards**  
Create real-time Flash graphs and KPIs over System i data with BCD's Free SmartCharts tool.

**Web-Based Portal Design & Administration**  
Create portal pages and portlets using WYSIWYG tools. Manage all Admin tasks via web interfaces.

**Controlled Access to Enterprise Information**  
Organized access within a secure framework to web applications (PHP and/or others).

**Powerful User Tools**  
Access System i spool files, create PDFs, To Do lists, 5250 emulation, Instant Messaging...
