

They won't Believe these are your IBM i Applications !

 **Presto™** - Rapidly web enable your green screen applications with **NO** RPG, Cobol or DDS code changes. Keep your IBM i relevant in the eyes of your users and upper management.

- ✓ Give your users browser based access to existing apps in a modern look that's easier to navigate.
- ✓ Add new functionality: Images, drop down boxes, links, graphs, Google maps, calendars, AJAX and other UI elements. All screens run in batch mode.
- ✓ Very affordable Base and Unlimited User pricing.

“ The time and money it would take to accomplish what Presto allowed us to do in-house, is hardly fathomable.... Depending on how intricate you want your screens, Presto can work straight out of the box, or it allows you to enhance just about anything you can dream up.... Both options are possible with Presto. That's the beauty of it... Flexibility !
 — Felicia Krubl, PA, National Van Lines, Inc. ”

 **WebSmart® PHP** &  **WebSmart® ILE** - Rapidly create new web applications, in five minutes, using program templates and wizards that guide you through every step.

- ✓ Use WebSmart PHP for all platform and open source web application development. Use WebSmart ILE for IBM i centric web application development.
- ✓ Both editions can reuse existing RPG & Cobol code as well as access IBM i and multi-platform data.
- ✓ Thousands of organizations succeed with WebSmart.

“ Perhaps the gold standard for the IBM i world in PHP development environments is BCD's WebSmart PHP with all its templates, wizards, and SmartCharts. Yes, you do have to purchase it, unlike many PHP development tools, but there is a real company behind it with real developers and real customer service standing ready to answer your very real questions.
 — Chris Smith, Senior News Editor, MC Press ”
