

SmartCharts

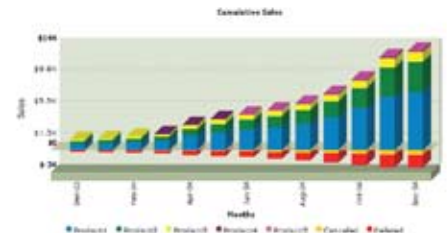

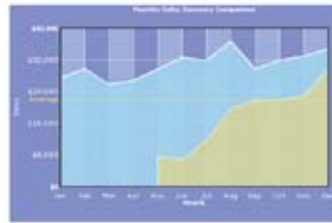

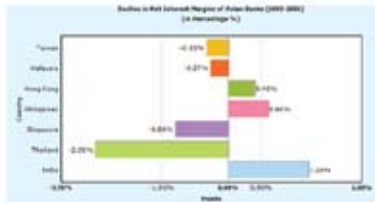

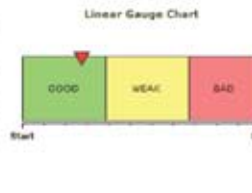

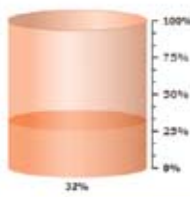

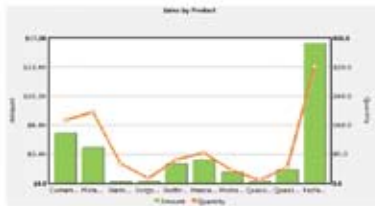

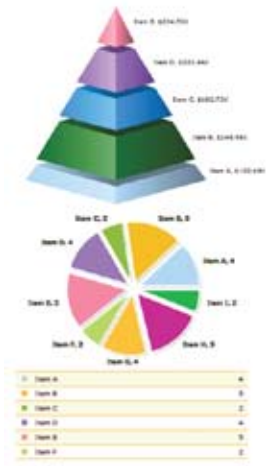

Progressive Charts & KPIs

Visually improve the communication of your enterprise data

SmartCharts uses Charts, Graphs and KPIs (*Key Performance Indicators*) to provide you instant snapshots of vital business metrics. This helps you visually improve the communication of business information with the ability to drill down into data, allowing you to monitor the pulse of your business.

BCD has empowered several of their web development and business intelligence solutions with SmartCharts at NO Additional Cost when you select BCD's WebSmart, Nexus and/or Clover solutions. SmartCharts with Progressive Charts and KPIs offers you the latest in single dimensional, three dimensional and animated KPIs:

- Graphs • Charts • Barrels • Speedometers • Style gauges and more...

You can easily integrate SmartCharts with BCD's WebSmart, Nexus and Clover solutions and any of your existing iSeries or PC applications, or spreadsheets to provide real-time summary views of important data. These KPIs give viewers the ability to drill down many levels to more detailed supporting information or to finer granulated graphical views of business information by simply clicking on graph columns, pie segments and more...

SmartCharts gives iSeries users the advanced modern tools to better analyze information visually, and better react to business conditions. And best of all, BCD includes SmartCharts with our solutions at no additional cost.

BCD now includes SmartCharts in the following products:

Integrate SmartCharts into WebSmart, Nexus, Clover and any of your existing iSeries, PC or Third Party Apps

- **WebSmart** - iSeries Web Application Development tool. Easily build powerful, sophisticated data analysis web applications that include presenting advanced graphical drill down KPIs in the form of charts, graphs and gauges. Launch WebSmart applications in browsers and/or integrate them into BCD's Nexus portlets.
- **Nexus** - Include SmartCharts into any Executive Dashboard and show KPIs based on your iSeries data from legacy apps, third party apps, PC apps, Spreadsheets and apps created through Clover or WebSmart.
- **Clover** - End-user Query Tool creates Web Queries & Reports without the user needing to know SQL or HTML. Use templates and wizards to produce Graphical KPIs with drill down capabilities that display iSeries summary data with No programming required. Launch Clover in any web browser or from BCD's Nexus solution.

See the many benefits of SmartCharts - Download one of the three above BCD solutions today!
