

WebSmart PHP is much more than an IDE, it's a complete System i & multi-platform Rapid Application Development Solution

WebSmart PHP includes DB2 and MySQL PHP templates that guide you through every step to create powerful, non-proprietary, dynamic Web applications that run with free Zend Core. The WebSmart templates do the ground work for you and let you focus on the business logic unlike other IDEs that start with a blank slate. And, with over 20,000,000 PHP web sites, you know it's a widely accepted language.

More reasons to choose WebSmart PHP

- ✓ Leverage existing RPG code & use System i specific PHP functions along with 5,000+ organized PHP functions.
- ✓ It creates 100% PHP code with No proprietary code.
- ✓ Integrate your PHP apps with the license free Nexus Portal for a secured & robust deployment framework.
- ✓ SmartCharts is included at no cost. Visually represent data in Flash Charts (*bar, pie, gauges, KPIs*).

WebSmart has gained the approval of thousands of organizations and won 13 industry awards demonstrating it's a proven tool you can trust, and try with confidence.

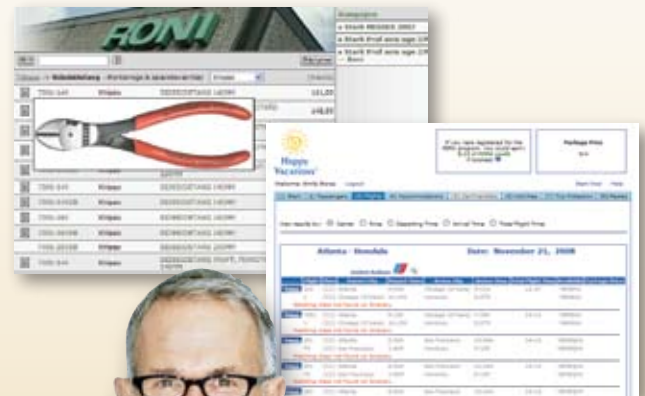

Develop interchangeably in WebSmart PHP or WebSmart ILE using one intuitive IDE. Both editions offer Templates, Wizards, Visual HTML editor and prebuilt routines. Create inquiries, Maintenance programs, Order Entry, Shopping Carts and complete B2B, B2C sites serving dynamic web content. Both support WebServices, SOA, XML, AJAX, Dashboards, KPIs, Email, Encryption, Excel output *and more*.

WebSmart is trusted by thousands of small, medium & large organizations including: Starbucks, Universal Music Int'l, United Rentals, Formica, Hickory Farms, Kawasaki, Goodyear, Nucor Steel, State of California *and more*.
