Create Web Applications in 5 minutes

WebSmart program templates and wizards create the PHP and/or RPG, HTML and CSS for you. You start out with a fully functioning program instead of a blank palette. And, WebSmart gives you full access to the code to make any enhancements including adding Web 2.0 functions.

Only WebSmart™ gives you all of these choices:

- **Editions:** WebSmart PHP for all platform and open source web application development or WebSmart ILE for IBM i centric web application development.
- **Platforms:** Host on IBM i, Linux and/or Windows.
- **Databases:** Create web apps over DB2, MySQL, MS SQL & Oracle.
