

WebSmart® offers you more Web Application Development choices !

More Languages:
PHP + ILE RPG

More Platforms: **System i,
Power, Linux, Windows...**

More Databases:
DB2, MS SQL, MySQL...

Only WebSmart lets you develop System i web apps in **PHP** and/or **RPG CGI**, plus access DB2 data from your System i and multi-platform data using MS SQL & MySQL. WebSmart is so versatile it even lets you deploy your apps on **System i, Power, Linux & Windows**. *Your choice !*

The advanced WebSmart templates, wizards and visual HTML editor do the ground work for you letting you focus on business logic. And, unlike some other IDEs WebSmart won't start you off with a blank slate.

Soon you'll realize why thousands of organizations prefer WebSmart, and why it leads the market with 13 industry awards. BCD lets you prove everything in advance, offers more functionality and saves you more money. WebSmart is a component of BCD's ClearPATH Modernization Suite. IBM Server *Proven*

Winner of 35+ Industry Awards !

"KMR Systems has adopted WebSmart PHP to extend our applications beyond the green screen. We are able to provide improved access to information in our existing application suite, through the browser, to multiple deployment vehicles, in much reduced development times."

"KMR is also developing new application modules with WebSmart PHP and Nexus portal for application frameworks, allowing us to extend our existing DB2, SQL and ILE RPGIV applications beyond their limits, without losing the investment we have already made. And with BCD's attention to training and support, rapid development is a reality."

*Trevor Perry, CTO of KMR Systems Corp.
IBM Vertical Industry Program (VIP) Member*
