

Everything you want to do on the Web You can Do with your iSeries - i5 and WebSmart

Right Here - Right Now

WebSmart™

All without the complexities of WebSphere - and - Without having to Exit the platform

See just how fast RPG People can Go -- *Test drive WebSmart today!*

Read this compelling story how a one person IT shop using an iSeries - i5 and WebSmart single handedly transformed an entire organization from green screens to new Web apps.

• **What applications did you develop with WebSmart?**

Carter: "We did just about everything with WebSmart. For example, we did an order entry system for stock merchandise and a custom order entry system for custom orders. Dealers can check inventory, check prices, place orders, get PDF copies of their invoices, review order status, and track it with UPS. Our sales reps can track orders with ease now; before they had to call a skilled customer service person."

• **How many people staff your IT department?**

Carter: "It's just me. I have to maintain all the PC's, write RPG and do all of the web development."

"WebSmart has helped us transform an antiquated system of green screen and file maintenance programs into a modern, state-of-the-art web-based system..." (more on BCD's site)

*Stacy Carter, Systems & Information Manager
Mississippi Sportswear, a Division of Betlin, Inc.*
