

Increase the value of your IBM i business

Reduce costs, increase revenue and improve services using BCD's integrated modernization suite of award winning solutions !

Only select the components that best suit your needs

Web Enable:

Get more out of your 5250 screens by giving them all a Web GUI and by extending their functionality.

Web Reports, Queries and Dashboards:

Improve decision making by providing real-time snapshots of your organizations data.

New Web Applications:

Increase revenue and reduce customer service costs with online order entry or self serve web apps.

Document Distribution:

Reduce printing and mailing costs with automated, digital document and report distribution.

Secure Web Portal:

Increase the productivity of employees, clients & partners by making documents and enterprise information easier to access.

Your organization is unique, and so are your modernization needs

Only BCD lets you select from a family of award-winning integrated modernization solutions to build your own customized suite. Start with one, a couple of components or BCD's complete ClearPath™ Modernization Suite to meet your exact needs and reduce the cost of ownership.

Using IBM i software tools that communicate with each other, and dealing with a single vendor who assures seamless support for your customized suite, makes this a very smart choice.

1,000's of BCD clients have successfully modernized their IBM i businesses

BCD offers the experience, solutions, support, training and professional services to modernize all size organizations, and we have the references to prove it. We're committed to helping you successfully modernize too.
