

# Had enough of all the complaints?

Use **Presto™** to give your green screens the Web GUI they need

Management and users alike will love the modern look and ease of use Presto gives your 5250 programs. You'll love how fast you can transform those dated programs into web pages, and turn those complaints into kudos.

**You get quick results** because ALL your green screens are instantly web enabled without you having to touch them or your proven source code. This gives you more time to further enhance your most popular screens.

**Developers with no HTML knowledge** can add drop down boxes, datepickers, images and other UI elements that make your users more productive.

**Your users can easily access** their programs with a browser. No ActiveX, Windows Servers or other software are required.

*Presto web enables ALL green screens including third party apps and those missing source code*

**Turn those complaints into kudos today !**
