

# Introducing WebSmart® Mobile

Included with WebSmart ILE and PHP

## Creating new IBM i mobile web apps just got a whole lot *faster* and *easier*

New WebSmart Mobile jumpstarts your IBM i mobile web app development. With WebSmart's new mobile templates, you'll be creating fully-functioning RPG or PHP mobile web apps in minutes. You can then use wizards or edit the generated code to produce any mobile web app you need.

Benefits of WebSmart Mobile web applications:

- ▶ Work on all mobile platforms (*iOS, Android, Windows, BlackBerry*)
- ▶ Access from browsers - no need to deploy from app stores
- ▶ Built with modern technologies, including HTML5 & jQuery Mobile
- ▶ Touch gestures and automatic screen resizing
- ▶ Add geolocation and offline functionality
- ▶ Point and click to add more mobile UI components

**Watch a video or download a 30-day trial at [bcdsoftware.com/wsmobile](http://bcdsoftware.com/wsmobile)**

“All of the web applications we created for PCs with WebSmart display and work beautifully on iPads with no special programming.”

— Marjorie Crouse, Seneca Sawmill
