

Accelerate your web application development with **WebSmart®**

Rapidly develop any type of web application and speed through the web development learning curve.

WebSmart program templates create the initial HTML, CSS and PHP or RPG for you. You start with a fully functioning web application instead of spinning your wheels figuring out how to start.

Features that will accelerate your web development:

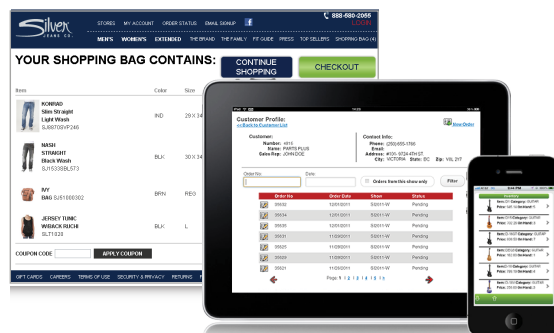

- ▶ HTML tools, code prompting and debugger
- ▶ DB2, MySQL, MS SQL and Oracle templates
- ▶ Wizards to call back-end RPG programs
- ▶ Web Services, AJAX and jQuery enabled

Two powerful and easy to use editions

Develop PHP or ILE web applications with WebSmart. Pick the edition(s) that best fits your IT environment:

PHP: Open source and host on IBM i, Linux or Windows

ILE: IBM i centric & faster for RPG programmers to learn

Create any type of web app for any business need with either WebSmart edition.

“WebSmart makes developing powerful web-based applications very easy and fast. It allows our users to easily access, manage, and present data from multiple sources, which makes it easier for them to do their work.”

Bill Hicks, Lamps Plus
