KMR Systems Succeeds with BCD's ClearPath Modernization Suite

Modernization means different things to different people, and for Michael Galligan, KMR Systems' president, CEO, and IBM VIP (*Vertical Industry Program*) member modernization meant getting their existing applications to the Web and developing new System i and multi-platform Web applications using his existing IT staff. KMR selected these ClearPath modernization suite components: WebSmart PHP, Nexus Portal, Clover Query, and Catapult for document management.

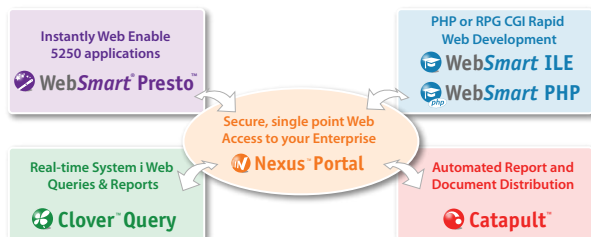

"We considered many System i modernization approaches before making the strategic decision to go with BCD. Their ClearPath integrated modernization suite offers state-of-the-art products that made our offerings cutting edge. We're now providing modern solutions to satisfy the needs of our Union and Benefits clients across the country. Our new modernized Web application suite allows us to outperform our competitors on other platforms. We now have an open source product that expands our capabilities by sharing with other open source products. We're extremely happy with BCD's excellent support, and as an added bonus, the cost was reasonable," said Mr. Galligan.

"KMR is also developing new application modules with WebSmart PHP and Nexus portal for application frameworks, allowing us to extend our existing DB2, SQL, and ILE RPG IV applications beyond their limits, without losing the investment we have already made. And with BCD's attention to training and support, rapid development is a reality."

— Trevor Perry, CTO, KMR Systems

BCD's ClearPath Modernization Suite components

BCD's **ClearPath Modernization Suite** uniquely offers customers the option of building their own customized solution. Clients choose the specific integrated component(s) they need from a family of award-winning solutions to get exactly what they need to meet their modernization goals, all while keeping costs in check. Choose from these integrated ClearPath components:

- **WebSmart PHP** or **WebSmart ILE** for rapid System i and multiple-platform Web application development.
- **WebSmart Presto** for instant Web enablement of existing 5250 applications with no coding changes and zero 5250 OLTP.
- **Nexus Portal** for secure single point of access to enterprise information for clients, vendors, and employees with application frameworks.
- **Clover Query** for real-time, drill-down System i Web queries, reports, and dashboards.
- **Catapult** for automated report and document distribution with Web archiving and indexing.

Modernizing with solutions that communicate with each other and dealing with one single vendor who ensures seamless, ongoing support make BCD's ClearPath modernization suite the smart choice. Customers select the integrated components they need now and can add on others as their business requirements change. BCD also offers professional services including jump-start, tandem, or complete project development services.

To see whether ClearPath is the right modernization solution for you, complete your modernization profile by clicking www.bcdsoftware.com/profile.

Based on your profile answers, BCD will generate a complete modernization report detailing the ClearPath components, prices, and possible professional services you'll need to meet your modernization goals. In addition, BCD will send you a **\$1,000 BCD software certificate**. You can also request to talk to some of BCD's thousands of modernization references, schedule a personal live Web demo, and try any of these solutions on a free evaluation to prove them for yourself. ■
